problem solving & analytical thinking

creativity & innovation

PROJECTS

RECYCLINI: Product Owner , Full Stack Developer

Feb 24 - Mar 24

- Designed the database schema, utilizing Sequelize for implementation, ensuring accurate representation of tables and relationships, enhancing database management for the application.
- Architected the front end using React Native for the home screen and blog screen, delivering a responsive UI with clean aesthetics through proficient CSS
- Developed an admin dashboard using a MUI template, enabling comprehensive management of application sections, including user management, eco tips category management, and user blogs.
- Integrated API and RESTful back-end with Express and Node.js, tackling variable-level coding challenges to ensure seamless functionality and robust communication between front and back ends.

EXCLUSIVE : Scrum Master , Full Stack Developer

Feb 24

- Created a full web interface for the seller in the E-Commerce project. Design a user-friendly interface utilizing Tailwind CSS, React, and Cloudinary. Implement a RESTful API with complex-level code in the backend.
- Combined React, Tailwind CSS, and a full RESTful API to create an admin dashboard from scratch, enabling efficient management of both user and seller interfaces.
- Manage the workflow on GitHub by handling merges and resolving conflicts arising from the contributions of other team members.
- Break down the project into manageable sprints, assign tasks to team members, and ensure everyone meets their deadlines.

PROFESSIONAL EXPERIENCE

CYBERAX LLC

Mar 23 - Aug 23

Full Stack Web Developer

Created a dynamic showcase website for CYBERAX LLC

- Implemented dynamic features to showcase CYBERAX LLC's services and portfolio using React js
- Created intuitive navigation and engaging user experience.
- Developed a system to streamline the CV submission process by implementing functionality to allow only qualified candidates to proceed with applications and upload their CVs.
- Translated client requirements into technical specifications.
